AREAS OF ACTIVITY

The SIL, VERTECH's Production Monitoring System and Quality Control system, offers a clear view of production by supplying information in real time about losses and defects to all actors of a glass plant.

Benefits of the SIL system:

- Save time by sharing information
- Improve your output by reacting quickly to important events
- Reduce customer risk thanks to a total traceability of your productions

The SIL is able to communicate with all types of inspection machines on lines and control devices in the laboratory: Multistation, Check+, M1 from MSC-SGCC, Veritas, Prolaser from Emhart-Powers, SPT from AGR ...

With more than 450 lines equipped worldwide, VERTECH' has become a confident partner of major international glassmakers for the monitoring of production and quality controls.
